## DATA SHEET

FEATURES

Dual ( $2 \times 32$ ) 2-wire matrix
Configure as ( $2 \times 64$ ) under program contro
Switch up to 300V, 2A - highest at this density in its class
Extensive signal shielding, and differential signal routing employed on PCBs for excellent signal fidelity

Columns can be connected to the EX1200's analog backplane and can use the internal DMM

Ex1200 series can support $2 \times 348$, two-wire
configurations in a lU full rack mainframe

## OVERVIEW

The EX1 200-4264 is a high-density matrix module which allows the user to connect any input row to any output column with a DPST relay at every row/column crosspoint. Each signal pair in the rows and columns are carefully routed as a differential pair, improving measurement signal integrity. This architecture provides the framework for flexible switch system designs where multiple test instruments need to be connected to common test points. For example, sense and excitation channels from a digital multimeter, counter/timer, and digitizer can be connected to the input rows and each device can be connected to any of the output column depending on the measurement function that is desired during the test. The connections between rows and columns occur internal to the module which greatly reduces external cabling

The smallest building block is a ( $2 \times 32$ ) 2-wire matrix, and rows of two banks can be joined together to create single $(2 \times 64) 2$ wire matrix. A ( $2 \times 348$ ) 2-wire matrix can be accommodated in just 1 space, using an EXI 200 series full rack mainframe. The two banks of matrices can be joined, as well as connected to the EX1200 DMM's analog backplane bus to further simplify field wiring

Relays capable of switching up to 300 V and up to 2 A are used to maximize the range of application spaces that can be addressed with this module. All relays are failsafe which ensures that no undesired signals are present at the user interface in the case of power interruption.

## General Specifications

RELAY TYPE
CONFIGURATIONS
MAXIMUM SWITCHING VOLTAGE
MAXIMUM SWITCHING CURRENT
MAXIMUM SWITCHING POWER
PATH RESISTANCE
INSULATION RESISTANCE
MAXIMUM THERMAL OFFSET
BANDWIDTH (-3 dB)
CAPACITANCE
Open channel
Channel-mainframe
High-low
CROSSTALK (TYPICAL)
1 MHz
10 MHz
ISOLATION (TYPICAL)
1 MHz
10 MHz
RATED SWITCH OPERATIONS
Mechanica
Electrical
SWITCHING TIME CONNECTOR TYPE

> Electromechanical, fail-safe
> Dual $2 \times 32$ two wire, single $2 \times 64$ two wire $300 \mathrm{~V} \mathrm{AC}, 300 \mathrm{~V}$ DC
> 2 A
> $60 \mathrm{~W} \mathrm{DC}, 62.5 \mathrm{VA}$
> $<500 \mathrm{~m} \Omega$
> $>1 \times 10^{9} \Omega$
> $<10 \mu \mathrm{~V}$
> 45 MHz typical
> $<50 \mathrm{pF}$
> $<80 \mathrm{pF}$
> $<50 \mathrm{pF}$
> $<-70 \mathrm{~dB}$
> $<-50 \mathrm{~dB}$
> $<-60 \mathrm{~dB}$
> $<-50 \mathrm{~dB}$
> $1 \times 10^{7}$
> $5 \times 10^{5}$ at full load
> $<10 \mathrm{~ms}$
> $104-\mathrm{pin}$

## Ordering Information

ACCESSORIES AND TOOLS
70-0363-504 Strain relief bracket (includes connector, recommended accessory)
70-0363-503 Strain relief bracket kit (without connector)
52-0109-000 Crimp pin (includes 100 crimp pins)
27-0088-160 Mating connector (one per board)
46-0010-000 Crimp tool (DIN)
46-0011-000 Extraction tool (DIN)
70-0363-505 160-pin, unterminated cable assembly, 3 ft
