## OVERVIEW

The EX1200-5002 and EX1200-5007 are high-density general purpose 2 A switch modules designed for systems where individual relays can be used to route signals to/from the units under test (UUT) or combined externally to form user-defined configurations. These relays are commonly used to create complex signal distribution networks that can be reconfigured through different wiring in test adapters. For example, three relays on an EX1 200-5002 module can be configured as a SP4T tree and seven relays can be configured as a SP8T tree. Up to 180 individual SPDT or 480 SPST relays can be accommodated in a full rack mainframe for maximum density. These modules can also be configured with other EX1 200 series switch modules as part of a flexible system switch design

Since these modules may be used to switch power to the UUT or interface, the digital input lines on the EX1200 series mainframes support the ability to force all relays automatically to their normally open state if a fault condition occurs. This approach instantly removes all powe to the UUT or interface. These modules can be automatically configured in the setup phase a the beginning of each scan step to facilitate test sequencing and control.

## General Specifications

| CHANNEL COUNT |
| :---: |
| EX1200-5002 |
| EX1200-5007 |
| MAXIMUM SWITCHING VOLTAGE |
| MAXIMUM SWITCHING CURRENT |
| MAXIMUM SWITCHING POWER ${ }^{1}$ |
| MINIMYM CONTACT RATING ${ }^{2}$ |
| RATED SWITCH OPERATIONS |
| Mechanical |
| Electrical |
| SWITCHING TIME |
| PATH RESISTANCE |
| INSULATION RESISTANCE |
| MAXIMUM THERMAL OFFSET PER CHANNEL (HI-LO) |
| CAPACITANCE |
| EX1200-5002 |
| Open channel |
| Channel-mainframe |
| High-low |
| EX1200-5007 |
| Open channel |
| Channel-mainframe |
| High-low |
| BANDWIDTH (-3 dB) |
| EX1200-5002 |
| EX1200-5007 |
| CROSSTALK (TYPICAL) |
| 100 kHz |
| 1 MHz |
| ISOLATION (TYPICAL) |
| 100 kHz |
| 10 MHz |
| CONNECTOR TYPE |

32 SPDT
12 SPDT

104-pin
Notes:

1. Maximum switched power is derated non-linearly as voltage is increased.
2. This value is in reference to a resistive load. Minimum capacity changes depending on
switching frequency and environmental conditions.

## Ordering Information

## EX1200-5002

EX1200-5007
ACCESSORIES AND TOOLS
70-0363-501
27-0389-104
27-0390-104
70-0297-001
70-0367-003

32-channel $300 \mathrm{~V} / 2$ A SPDT switch
12-channel 300 V/2 A SPDT Switch

104-pin HD D-sub mating connector and backshell, with 3 ft unterminated 22 AWG wire 104-pin HD D-sub mating connector with hood and pins, fixed contacts (no crimp tool required) 104-pin HD D-sub mating connector, backshell and pins, crimp style Crimp tooling, includes handle and positioner, 22 AWG EX1200-TB104SE, single-ended module (EX1200-5002 only)
